YOUNG ISOLATED MIGRANTS

E-FABRIK

WHAT WE HAVE LEARNT

Young migrants move from being seen as problem to a solution

We could highlight their competences (resourceful, crafty, engagement, ...) in a learning process

« Seeing a teenager touching a computer for the first time, almost, to order a 3D printer ... it's smashing ! »

Guillaume, FabLab manager

E-FABRIK

**It is possible for a science institution, to be very edgy/innovative and inclusive
... but that requires really stepping outside our comfort zone !**
