

## “CLEVERFOOD” EXHIBITION TENDER

CLEVERFOOD “Connected Labs for Empowering Versatile Engagement in Radical Food system transformation” is a European project that aims to mobilize European citizens to transform the European food system towards a more regenerative, resilient and plant-based food system, in line with the EU “Food 2030” Food Policy Framework and the Farm to Fork Strategy.

Within the frame of the CLEVERFOOD project, a new interactive travelling exhibition is being developed. The exhibition has as main objective to mobilize society towards the food system transformation, by raising awareness and empowering citizens, encouraging them to adopt more sustainable and healthy eating habits, and to participate more in policy and social decisions.

A tender was launched by one of the project partners (Ciencia Viva – National Agency for Scientific and Technological Culture), with the purpose of signing a CONTRACT FOR THE DESIGN OF VISUAL AND SCENOGRAPHIC IDENTITY, DEVELOPMENT, PRODUCTION, SUPPLY AND INSTALLATION OF A TRAVELING SCIENTIFIC EXHIBITION UNDER THE THEME “CLEVERFOOD”.
