how risk shapes
and challenges us

travelling exhibition

show your visitors how to dare safely!

What is Risk? A responsible approach to risk-taking requires an informed evaluation of the situation. The law of large numbers, the mathematical formula for calculating risks, and a description of three worlds of risk are among the tools that will familiarize visitors with the subject.

individual daring

Being daring while avoiding dangerous risk-taking involves knowing when to back off, how not to be influenced by a sense of control, and accepting the fact that risk assessment depends on a person's character and values. Will visitors manage to avoid such pitfalls when they try their hand at tightrope walking or wearing a pair of vision-blurring glasses?

shared risk

What about risk-taking by groups of people or society as a whole? Whether the question is the strategy to choose in defusing a bomb or in dealing with an emergency situation, this last section of the exhibition shows what's at stake in collective decision-making and risk management.

HIGHLIGHTS

- 🕒 Practice facing our fears by walking on a tightrope like a tightrope walker!
- 🕒 Discover if we are brave risk takers and reflect on our own perception of risk!
- 🕒 Learn the emergency procedure of trying to defusing a bomb
