# FLYING SCOTSMAN

VR EXPERIENCE

## Flying Scotsman VR Experience

To mark the occasion of the centenary of the Flying Scotsman, we have commissioned a brand new VR experience – It will allow guests to become immersed in the world of Flying Scotsman, adding a touch of magic as they step through real-world doors, onto the huge scale platform at Kings Cross Station to come face-to-face with this celebrity engine.

From there, the VR journey follows a narrative inspired by the incredible history of the famous steam engine all around the world and back again, bringing guests back to the real world but revealing a final twist: they have arrived at Edinburgh station – completing the Scotsman's most iconic route from Kings Cross to Edinburgh.
